OLD FASHIONED GARDENS
MOUNTVILLE LANC. CO. PA.

Notice to Customers

Not less than 6 of a variety will be supplied at the dozen rate, nor less than 25 of a variety at the hundred rate, nor less than 250 of a variety at the thousand rate.

No charges for packing. We use wooden boxes, or other suitable materials.

Customers desiring stock shipped C. O. D. must remit one-fourth of the amount of their purchase when ordering.

Please state whether goods are to be shipped by express, freight or mail.

Claims, if any, must be made promptly on receipt of goods, when they will be carefully examined, and, if just, all made satisfactory. Claims made after ten days from receipt of goods will not be entertained.

I warrant all stock true to name, with the express understanding and agreement with the purchaser that, should any prove not true to name, I will return the money paid, or will replace with other stock; but it is mutually agreed between the purchaser and myself that I shall not under any circumstances be held responsible for a greater amount than the original price of the stock.

TERMS OF PAYMENT: To customers of established credit or whose responsibility is known to me, my terms are sixty days net. Others will please send cash with their orders, or three references to parties in the trade with whom they have had credit relations, and allow sufficient time to investigate same.

Prices herein are adjusted in consideration of stock and present day conditions. We guarantee satisfaction, or your money will be refunded.

My reference: The Mountville National Bank, American Express Co., and our increasing business.

RESPONSIBILITY

Old Fashioned Gardens with its greenhouses are owned and operated entirely by myself and I personally supervise the growing of plants and filling of orders and assume the responsibility of them to the amount of cash you send me, guaranteeing satisfaction. During the busy season many things must be entrusted to my helpers. Should you at any time find any fault with our stock or service write me personally and I will give you my personal attention.

JOHN L. LOCKARD

Selecting Hardy Plants and Flowers

It is possible to have some show of color in every portion of the garden at anytime, with perennials.

In planting the hardy border the taller growing sorts should be placed in the background: a few of these are Boltonias, Cassia, Hollyhocks, Golden-glow, Mallow, Sunflowers, etc. The front of the border should be laid out in the dwarf growing type, the intermediate rows will take care of the great majority of perennials; the principal requirement is their location, being so disposed that colors will not clash or be unequally distributed, variation in the blooming season must also be considered in order not to have some sections of the garden without some show of color at anytime.

Planting—The roots may be planted as early in spring as the ground is pliable, soil not to be wet or soggy. Large clumps are not necessary, the smaller divisions or pot grown stock often showing more thrift and developing into shaplier plants than the old roots.

Any soil moderately enriched with rotted manure, bone meal or sheep manure, dug deep and thoroughly mixed will be satisfactory.

Spacing—In planting perennials, varieties that do not grow above 2 feet may be planted about 12 inches apart. Taller ones at an interval one half the ultimate height. Crowding or stingy planting to be avoided for perfect effect and healthy growth.

Cultivation—Keep the soil well cultivated free from weeds and litter, except during drought and mulch of grass (lawn sweepings) will help retain moisture and keep the soil from baking.

Training—Staking at an early date will adjust later defects and will overcome the tied up appearance of the plant that has been allowed to develop before given support.

Tidiness—It is a necessity to have an attractive garden, removing dead flowers, withered leaves, broken twigs, etc., will well repay the time and attention given.

Dividing—The early flowering types are generally dwarf and close rooted, these do not need to be disturbed for several years. The tall sorts of later summer and fall are fast growing, for general appearance and quality of bloom these should be taken up, divided, and a part only replanted at least every second year.

Winter Protection—It will be necessary to protect some of the less hardy plants in the border. Not all of them require it, Iris, Phlox, Peonies and Oriental Poppies withstand severe winters without protection. A light covering of straw, stable manure or leaves will protect the less hardy plants, after removing all stems and dead foliage during the last days of November or before severe cold weather sets in, apply this dressing, removing it gradually in the spring as the frost begins to leave the ground.

Hardy Pinks

Pyrethrum Roseum

ROCK GARDENS

Suggestions for Building

A charming Rock Garden, like happiness, may be awaiting you in your own back yard. The Rockery may be large or ever so small. If you have a spot only 6 by 8 feet, you can convert it into a miniature Rock Garden of real beauty. In building a Rock Garden location is first to be considered, then materials for the size Rockery you have planned.

Regardless of what type Rock Garden is to be built the top soil must be dug in preparing the site. This soil should be sifted and later used as a back fill.

Drainage is so important in making a Rock Garden that it should be considered before any of the rock are laid. For ordinary drainage conditions several inches of coarse gravel, stove or coal ashes placed about 18 inches below the surface of the garden space will take care of the excess water.

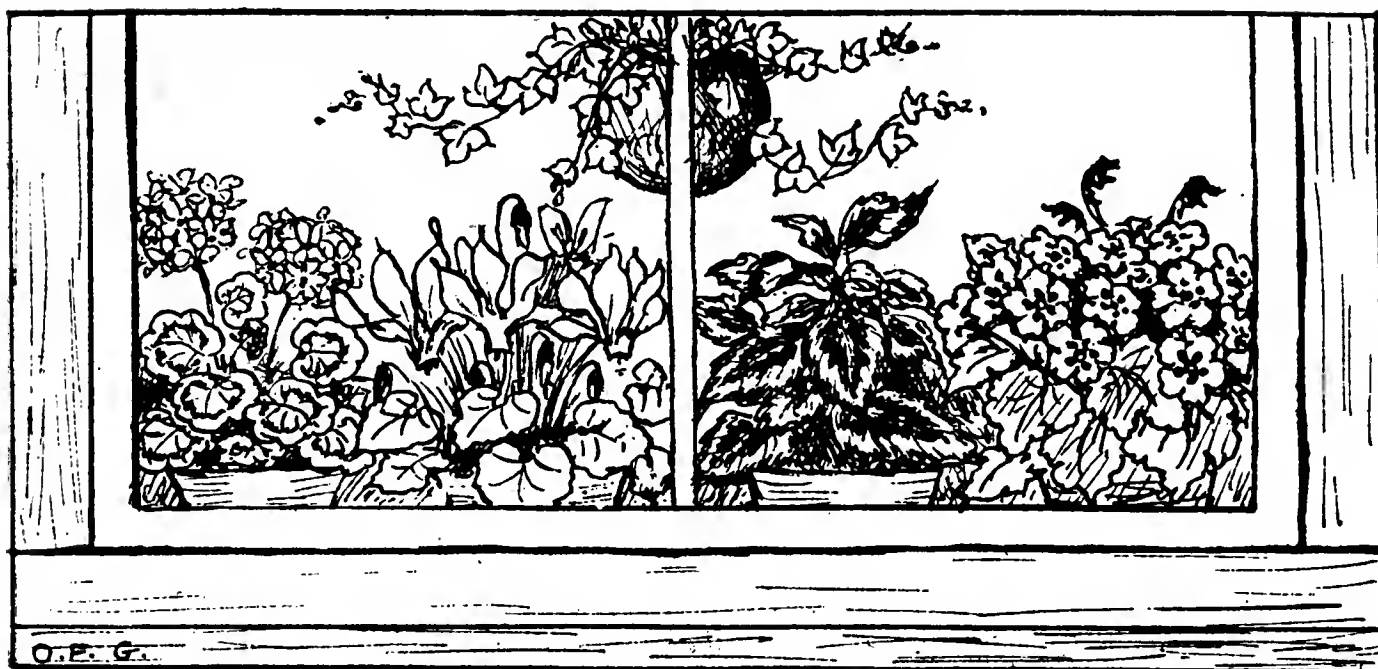

The stones selected should never be all the same size, no matter what type of garden or kind of rock is used. As the stones are placed each one should be embedded so firmly that its own weight will hold it in position; if any of the stone, after being placed, seems

to slide or wobble when stepped on, it should be reset. Construction work should be carefully done in the beginning for it is difficult to repair a Rock Garden. In placing the stone they should be set with a slight slope toward the rear so that the water will run in toward the plant roots. Stones have the characteristic of equalizing the temperature of the soil, keeping it cooler by day and warmer by night.

Soil in a Rock Garden may range from sand and gravel with no humus in it to rich, highly acid leaf mold, the soil should be fitted to the type plants one has planned to use. For most Rock Gardens and for most situations a loamy soil will meet the general needs.

Plants suitable for the Rockery are almost unlimited. Where space permits a few dwarf evergreens planted about. There are also flowering shrubs of dwarf habit that make a pretty contrast to the blooming plants.

We have a large variety of strong field grown plants in stock that will give immediate result, and can append the following list as being adapted for rock gardening.

Window or House Plants

MISCELLANEOUS PLANTS

Impatiens—Are a fine free blooming house plant also good for bedding. As a house plant they are in continual bloom if given plenty of sun. The large flat single blooms make a pretty contrast to the background of glossy leaves. 20c ea., 3 for 50c.

Oxalis or Wood Sorrel—Graceful small flowering plants suitable for post, hanging baskets or for bedding. They have clover-like leaves and thickly starred with small bright flowers, doing well in rich well drained soil and sunny location, flowers light pink. 20c ea., 3 for 50c.

Mesembryanthemum—(Ice Plant)—A splendid plant for hanging baskets or rock work. Narrow thick green foliage appearing to be covered with ice crystals, branching freely and bearing large, bright pink daisy like flowers with a yellow center. Easily grown and very attractive. 20c ea., 3 for 50c.

Vinca* Major—(Variegata)—More of this plant is used each year in baskets, vases, porch boxes. Beautiful variegated green and white foliage, strong trailing habits of growth; the bright blue Myrtle flowers contrast prettily against the foliage. 2¼ in. pots, 10c ea., 3 for 25c; larger 20c ea., 3 for 50c.

Thunbergia—Beautiful rapid growing vine suitable for baskets, vases or rustic work, flowers freely, colors white, lemon yellow to deep orange, all with dark eye. 10c ea., 3 for 25c.

Tradescantia—Wondering Jew, trailing plant with thick waxy leaves, suitable for boxes, baskets or vases. 10c ea., 3 for 25c.

Striata—Bright green striped creamy white. 10c ea., 3 for 25c.

Cyanotis Multicolor—Red-brown and green. 10c ea., 3 for 25c.

Abutilion—Green leaves with beautiful large bell shaped tangerine colored flowers. 20c ea.

Impatient—Salmon pink or purple. 15c ea., 2 for 25c.

Dusty Miller—The best small leaf deeply serrated variety for bedding. 15c ea., 2 for 25c.

Joint or Christmas Blooming Cactus is a very easily grown plant. Sending out a wealth of bright pink blooms during the winter months, the interesting jointed, drooping foliage is bright green. 20c ea., 3 for 50c.

CANNAS

Mrs. Alfred F. Conrad—The most popular pink Canna. It is unsurpassed for planting whether singly or in large beds. Green foliage. 25c ea., 3 for 65c.

The President—Green foliage—bright glistening scarlet, the individual florets being very large, best medium height bedding Canna. 20c ea., 3 for 50c.

Yellow King Humbert—A green leaved sport of the popular King Humbert, it has the same habit of growth and free flowering qualities but the flowers are bright yellow, lightly spotted with red. 20c ea., 3 for 50c.

PETUNIAS

Petunias are ideal for bedding, borders, vases, boxes and baskets, blooming continuously from early summer till frost. Pot.

Rose of Heaven—A fine bedding Petunia, a brilliant crimson rose color of rare purity. 10c ea., 3 for 25c.

Giant Ruffled—Mixed, very large flowers in a wide range of colors, some are self colors, while others are veined and blotched in a showy manner. 20c ea., 3 for 50c.

Elks Pride—Large flowers of deep velvety purple veined black. 15c ea., 3 for 35c.

Copper Red—(Ruffled Monster)—This is an improved type of the smaller copper bronze. 20c ea., 3 for 50c.

Giant Purple Glory—A specially recommended variety, blooms very large. 20c ea., 3 for 50c.

Crimson Beauty—Dazzling crimson. 15c ea., 3 for 35c.

Purple and White—(Star Petunia). This wonderful new addition to the balcony class is of velvet violet with a touch of crimson, starred with fine pure white blotches, flowers large producing a dazzling effect. 20c ea., 3 for 50c.

GERANIUMS

Pelagonium—Scented ivy leaved and variegated foliage varieties.

Mme. Salleri—Variegated foliage, round plant about 1 foot high and wide. Foliage bright green edged with white, compact grower.

Marshal McMahon—Variegated foliage variety, golden yellow with a zone of dark chocolate, fine large foliage and splendid bedder.

Mme. Languth—A very attractive variety having magnificent foliage broadly marked with silvery white; beautiful cherry red flowers.

Zonale—Foliage clear grass green with a distinct band of blue-black extending near the edge of the entire leaf; makes beautiful plants for bedding or windows.

Ivy Leaf Variety—Variegated foliage, yellowish white edging the green leaves; robust grower; light pink flowers.

Ivy Leaf Variety—Yellow leaf with distinct circle of amaranth shading to chocolate; strong grower; scarlet flower.

Plain Leaf Ivy Geranium—Semi-double; light pink flowers; valuable for baskets and boxes.

Plain Leaf Ivy Geranium—Double cerise flowers; valuable for baskets and boxes.

Pelargonium—**Regal Mrs. Layal**—The true pansy geranium; scented leaf variety. **Nutmeg**—**Rose**—**Mint**. Six large beautiful colors, mixed varieties.

GROW YOUR OWN CARNATIONS

Carnations can be successfully grown in any garden soil. They bloom freely up to the time of frost, after which time they should be potted and set in a sunny window, from which you will be able to cut flowers throughout the winter. Plan to plant some this summer and enjoy their spicy fragrance. Perpetual double flowering carnations, greenhouse type.

Spicy White—20c, 6 for 85c

Pink Abundance—20c, 6 for 85c

Pool Adds Charm to Garden and Fish and Waterplants Thrive Together

Pools may be constructed of varied dimensions according to the space available. In building a pool be sure to have proper depth. We have found by taking out the soil to the depth of three feet and spreading a layer of four inches of cinders on the floor of the pit before pouring cement no trouble will be encountered by breakage or leakage. They can be built with straight sides or sloped so that when finished they resemble the sides of a baking or serving dish. As to form there is no rule; you may build them square, oblong or curved. However, the more curves, turns or bends you can work into them add to their beauty and artistic workmanship.

At the top or soil level, bed in rocks with ledges upon which you can place shallow-rooting water plants that require a bit of soil. Back of that can be planted the moisture-loving dwarf rockery plants and from there on back to the top of the rockery will be found endless opportunities for placing the many beautiful low-growing rockery plants.

The ideal water pool when finished is about two feet deep. The side walls should be about six inches in thickness tapering to eight inches at the bottom. The bottom of the pool need not be more than six inches, carefully washed with cement water so as to

insure a perfectly tight basin. The cement should be mixed with one part Portland cement, two parts sharp sand, three parts half-inch gravel or crushed stone. Your local cement dealer will give you pamphlets on how to mix cement.

When the cement work of your pool is sufficiently dry fill it with water, watch carefully that there are no leaks. After about a week, drain the water out and wash the pool thoroughly. Then spread about two inches of well-rotted manure over the entire bottom of the pool. Upon this place six inches of good soil. You are now ready for the lilies, which may be planted in pool before it is filled with water. After the tubers have been set cover the entire surface with about two inches of sand and gravel. This will keep the fish from digging into the mud and insure clean, clear water. The sand is also beneficial to the health of the fish.

The pool may now be filled with water and left stand for about five days longer, after which time you can add any other water plants you desire. The fish may now also be placed in the pool. Do not change the water nor add chemicals as this will injure both plants and fish. Running water is not absolutely necessary for pools; if water appears to be stale it is much

better to add water with the hose or from faucet so that it will overflow from the top. If these few simple rules will be carried out you will be rewarded throughout the summer and until frost with no end of joyous surprises.

It will not be found necessary to drain pool nor remove the fish when freezing weather approaches, except with more tender plants. Keep the pool full of water to the top and put in two good chunks of wood. The wood acts as a shock absorber caused by the expansion when the water freezes, and there is little danger of pools cracking when wintered in this manner.

Hardy Waterlilies

Odorata Gigantea—A white, free bloomer, 75c ea., \$7.50 per doz.

Helen Fowler—Deep pink, fragrant, free bloomer. Price \$1.25 each.

Rose Arey. We consider this the most desirable of any fragrant lilies, brilliant pink petals pointed and uncurved. Flowers 7 to 8 inches in diameter. It is by far the finest of the Pinks. Price \$2.50 each.

James Brydon—Red. A very free bloomer. Broad massive petals. Well adapted to tub or pool culture. You can count on it blooming every day. Price \$3.00 each.

Paul Hariot (Changeable color), light yellow, delicately shaded copper-red. Large cup shaped flowers. Price \$3.00 each.

Marliac Chromatella—Yellow flowers. 4 to 6 inches. Leaves green mottled with brown. This plant should be divided every few years. Price \$2.00 each.

EUONYMUS JAPONICA

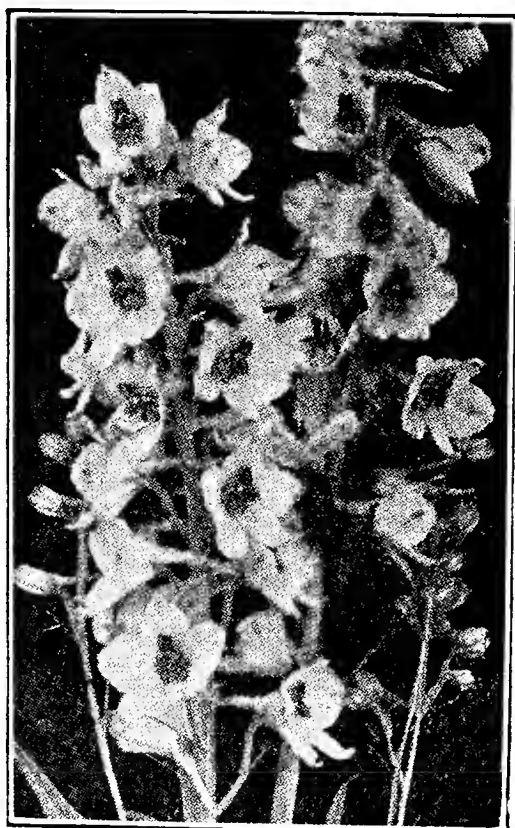

A very useful and decorative shrub with lustrous dark green leaves. Bush upright habit, 3 yr. plants, 12 to 15 in. 35c each, 10 for \$2.50.

NOTE: The prices contained in this catalogue are for strong plants of blooming age but do not apply to Special Landscape sizes selected by the customer on the grounds. Prices for same will be established according to size and value. However they will always be reasonable.

Hardy Perennial Flowers

The interest in gardening has vastly increased in late years, the hardy perennial herbaceous plants are coming into their own. The "Old Fashioned Garden" reminiscent of "Grandmother" and her times has been a commercial slogan and a garden fad for the past decade. Plant producers have enriched the available lists of material by incursions into other climes and distant lands seeking rare and unknown species and improving those types already known.

Through careful study the nurseries have learned to provide groups of plants for hot and dry locations, a different collection for shade and dampness, providing a variety of edging subjects so that artistically balanced color and blooming season in any location may be had. Many "back yards" have been changed from a place for storing rubbish into a place of beauty by planting hardy perennials. Planting can be started in spring or fall.

ORIENTALE POPPIES

Giant Hardy Perennial Poppies

Orientale Poppy

Cannot be produced true to color and for from seeds, therefore we have prepared a large list of the largest and best outstanding varieties, after carefully selecting parent plants. Our stock is built up by cuttings, therefore we are able to furnish the varieties listed true to name and sufficient age to bloom the first year they are planted. Orientale poppies should be planted EARLY SPRING. However, the best time to plant is starting July 20th until frost has closed the ground.

The following list will be found to contain the best of the old and the newly tested varieties. Many of these varieties will produce flowers from ten to twelve inches in diameter.

Name	Color	Height	Each	Three
Apricot Queen	Reddish apricot	2 Ft.	\$.25	\$.65

HARDY PHLOX

Medium tall varieties of Hardy Phlox are among the very showiest and most valuable of all hardy plants. They thrive in most soils, however, a loam is most desirable. They can be used to good advantage mixed in the hardy border or in solid beds. We offer strong field grown plants (clumps) at 20c each, three of one variety for 50c.

- Albion**, Pure white with faint red eye.
Antonin Mercier, Very large lilac flower with pure white center.
Baron von Dedem, Large trusses and scarlet-blood-red flowers.
B. Compte, Rich satiny aramamaranth red.
Beacon, Good size and habit, brilliant cherry red.
Champs Elysees, Dark purple; large trusses.
Commander-in-Chief, Crimson red with darker red eye (new).
Coquelicot, Glowing orange red with violet eye.
Deutschland or Homeland, Glittering orange, carmine blooms, tall growing var.
Eclairer, Purple crimson with light aureole reliable deep color.
Elizabeth Cambell, Light salmon changing to pink in center, very large spike.
Europa, White with crimson eye, a particularly strong sturdy variety.
Fiancee, Pure white, one of the best.
Jules Sandeau, A magnificent variety of moderate height, very large, pink.
Mia Ruys, Enormous trusses of pure white flowers, very free blooming, dwarf.
Miss Lingard, Earliest blooming of all Phlox, white with lavender eye.
Mrs. Jenkins, Pure white; very early.
Mrs. Millie Van Hoboken, Shell pink with silver reverse, large flowers.
Pantheon, Clear deep pink, with faint center.
Rheinlander, Soft salmon-pink, deep red eye.
Richard Wallace, White with carmine eye.
R. P. Struthers, Brilliant rosy-red, crimson center.
Rynstrom, Rose pink, very large, individual flowers.
Mrs. Jenkins, Pure white, large trusses.
Terre Neuve, Grayish lilac, violet center.
Thor, Rich, salmon-pink with deep crimson eye.
Coquelicot, Pure dark scarlet, deep eye.
Fred. Cortez, Dark red.
La Vague, Pure mauve-pink with red eye.
Widor, Reddish violet flowers with white center.

SPECIAL

All Hardy Phlox listed here are field grown clumps of selected varieties in 2-year clump sizes. We also carry 1-year plants, pot grown. Prices on application.

IRIS GERMANICA

German Iris; Fleur-de-Lis

Stately Iris

The greatest range of color is found in this section from pure white through all shades of mauve to blue and dark purple including marvelous "smoky" or "pastel" shades, rich bronze red, mahogany, golden brown, yellow, buff and lemon. The flowers rival orchids in beauty and structure and they have a delicate fragrance that seems to be only a natural accompaniment of such wonderful blooms. A well drained, sunny location, with the rhizomes just covered with soil, is about all the planting advice needed. Their blooming period ranges from May to June.

"S" represents standards or upper petals "F" falls or lower petals. We have based our prices on strong rhizomes selected to bloom the first year and according to the value of each variety.

PRICES OF IRIS SMASHED TO LOWEST LEVEL

Price except where noted fifteen cents each, three of one kind thirty-five cents.

- Afterglow, S. Soft misty lavender shaded yellow at center. 25 cents each.
- Amabilis, S. Pale lilac, flush rose. F. Velvety crimson purple. 2 feet.
- Astarte, S. Rosey lilac. F. Claret red. 2 feet.
- Attraction, S. Pale blue. F. Deep Blue, shaded lighter at base.
- Bismarck, S. Clouded yellow. F. White ground, reticulated light maroon.
- Blue Jay, S. Med. Violet blue. F. Deep shade of clear violet. 30 inches.
- Dalmarius, S. Grayish lavender. F. Deeper lavender. 2 feet.
- Darius, S. Rich canary yellow. F. Lilac margin white golden yellow beard.
- Dripmaid, S. White. F. White heavily veined madder brown. 24 inches.
- Du Bois Du Milan, S. Lavender. F. Rich crimson purple reticulated white. 26 inches.
- Eleanor, S. Glistening silver gray. F. Purplish crimson edged white.
- Exquisite, S. Clouded yellow. F. Rose lilac with orange crest. 26 inches.
- Florentina (Silver King). White slightly tinged with lavender; very early. 27 inches.
- Flavescens, A delicate shade of pale yellow, early. 20 inches.
- Fontarabie, S. Violet blue. F. Rich violet purple. 18 inches.

DELPHINIUM Hardy Larkspur

1 YEAR PLANTS

6 Lt. Blue, 6 Dark Blue—\$1.00

2 YEAR PLANTS

6 Lt. Blue, 6 Dark Blue—\$2.00

HARDY HERBACEOUS PERENNIALS

Hardy plants are our specialty. We make a careful study of the old-fashioned well-known varieties, constantly striving to improve the strains. When you order such as Shasta Daisy, Coreopsis and Gallardias, etc., we do not only send you the plants ordered, but our experience in selecting for you the best in Hardies goes with it.

These prices are based on strong transplanted Field or Pot Grown plants of blooming age, mostly two years old. We use pots of various sizes for some plants because they transplant better for our patrons.

ALPHABETICAL LIST OF PERENNIALS, COLORS AND HABITS

Botanical Name	Common Name	Color	Height	Season of Bloom	Remarks	Price Notes
Acanthus mollis	Bear's Breech	Blue-Purple	3 Ft.	July-Aug.	Sunny Border	35c ea.

BEGONIAS

Flowering

Useful for bedding in shaded places or pot culture
Strong pot grown plants (3 in pots), 25c ea., \$2.00 per dozen.

Varieties or Pot Culture

- Alba Picta.** White, very good and a scarce variety.
Albert Martin. Bright carmine.
Erfordia. Pink.
Fire Enchantment. Bright carmine scarlet flowers; especially effective for bedding. Brown leaves.
Fire Sea. Bright flame red blooms, very showy. (Dwarf.)
Flame of Love. Brilliant scarlet flowers with shining Golden Yellow Stamens.
Glory of Erfurt. Large flowered, brilliant carmine, extremely valuable variety for bedding.
Glory of Louvensis. Everblooming blush white blooms, dark green foliage.
Glowing Love. Brilliant scarlet-rose, very large, excellent.
Heterosis. A dwarf type, deep pink.
Luminosa. A magnificent variety with flowers large, perfect and plentiful, never out of bloom. Fiery scarlet, reddish brown foliage.
Meteor. Trailing, fiery red.
Pink Profusion. Everblooming beautiful bright pink flowers.
Prima Donna. Extra large, carmine rose.
Rundfunk. Flowers pure carmine-scarlet. Leaves dark green with brown edges.
Salmon Glory. Extra large perpetual flowering salmon of special merit.
Salmon Queen. Everblooming large salmon red blooms, bright green foliage.
Swabian Pride. Early and extremely free flowering, robust, easily branching and from 6 to 8 in. high. Enormous clusters of glowing carmine flowers.

Strong Pot Plants Except Where Noted, 15c Each

FOLIAGE BEGONIAS

- Rex**—Leaves olive green heavily blotched and mottled silver under part of leaves heavily veined with red and green. 20c ea.
- Rex**—Same type of leaves as former except that each leaf has a perfect whorrel or snail shell growth making it very pretty. 25c ea.
- Begonia Jewel**—Hardy tuberous rooted herbaceous perennial. When planted outdoors in moist shady places with good drainage the tubers may be left in the ground and will start the new growth in the spring just as peonies and perennial phlox. Flowers satiny rosy pink.
- Perfecta Leopardi**—Broad leaves heavily blotched and spotted white and green margined red; flowers bourn on long stems; colors rosy flesh shaded with silvery pink, the most beautiful begonia. 25c ea.
- Baby Rubra**—Small deep glossy green leaves bourn on graceful pink stems, well branched, the most graceful and smallest foliage begonia; flowers rosy carmine.
- Alba Perfecta Grandiflora**—Moderately tall growing variety with wooly, oblong apple green leaves, under side of leaves heavily veined maroon, a very easily grown variety.
- Perfecta Rosea**—Broad light green leaves, edged carmine, entire plant covered with beautiful rosy-carmine flowers.
- Thurstonii Olive**—Under side of leaves glowing wine red, heavily veined, upper side olive green both under and top of leaf show on this plant at the same time making it most beautiful of foliage begonias. Upper and under side of leaves covered with a bright glossy metallic lustre. 25c ea.
- Alba Picta Rosea**—Long pointed slender leaves thickly spotted with silver white, foliage medium, an elegant variety.

Coralline Lucerne—Strong vigorous grower of upright habit. The flowers are bourn in great clusters from 12 to 18 inches across, almost hiding the plant. Flowers beautiful bright red of a heavy waxen texture.

Otto Hacker—Long pointed plain green leaves, glossy; flowers beautiful glowing red. 25c ea.

Feastii or Beef Steak—A low spreading begonia with perfectly circular leaves, red beneath and dark glossy green above of leathery heavy texture.

Beef Steak Begonia—Crested—Description same as Feastii except that the leaves are serrated and ruffled; very beautiful. 25c ea.

Feastii Supreme—Snail leaf, Beef Steak Begonia heavily frilled and ruffled with whorrel or snail shell growth protruding from the leaf steam. 25c ea.

Argentia Guttata—It has purple bronze leaves oblong in shape entirely covered with silver marking. A most beautiful foliage begonia.

TUBEROUS ROOTED BEGONIAS

These plants are invaluable as pot plants and for bedding. The colors are vivid and distinct, the flowers are very large, from 2 to 4 inches.

When grown outside, should be taken up before cold weather, spread to dry, then packed in dry sand and stored for the winter a cool place, but where frost will not reach them. Before planting out in spring they

should be given a start indoors in pots, they do well in a partly shaded location in a light soil.

Crispa Begonia—Fringed and ruffled and flowers of immense size. Can be had in the following colors: Scarlet, orange, salmon, pink and white, yellow, white. Name your colors. 20c ea., 3 for 50c. Large 30c ea., 3 for 75c.

CHRYSANTHEMUMS

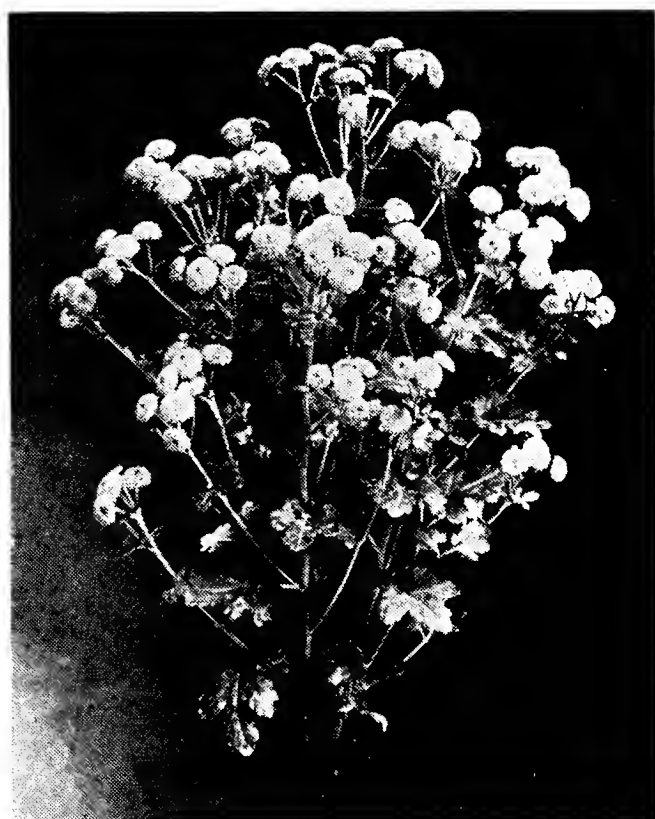

We Offer This Year Clean Thrifty Plants at New Low Prices

Hardy Pot Grown Plants. Plant any time safely.

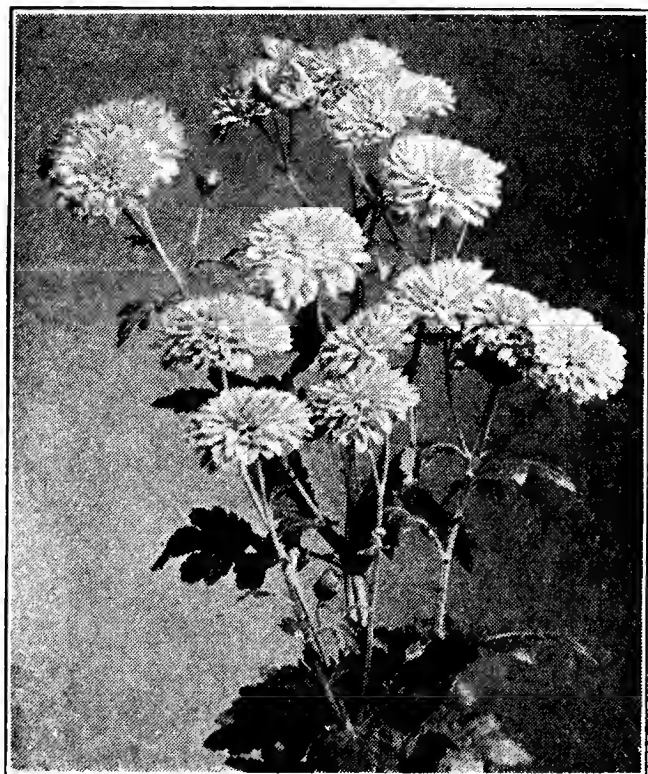

For \$2.00 I Will Send Postpaid 4 Plants Each of the Four Varieties on This Page — 16 Plants in All

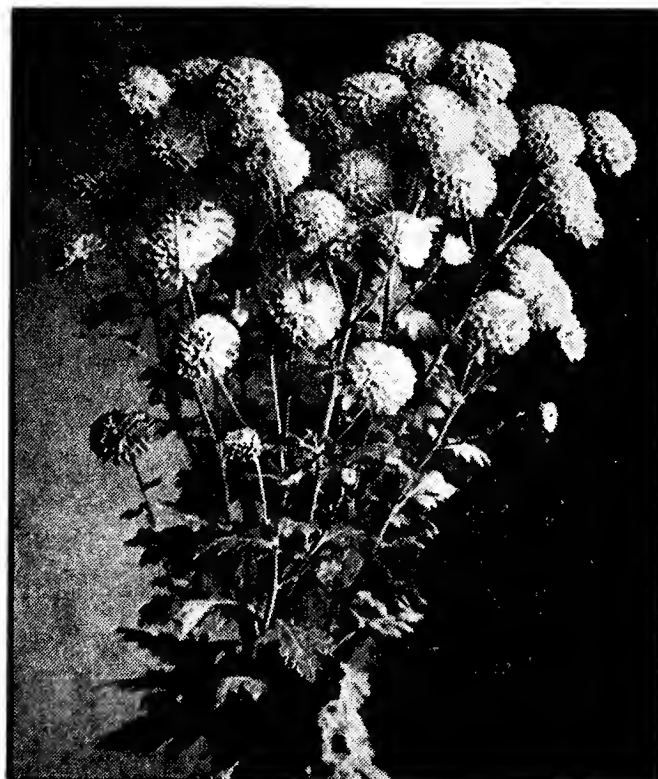

White Doty

Dainty Maid

Source de Or

H. Chrysanthemum, New York

CHRYSANTHEMUMS

Exhibition Varieties, Flower 6 to 10 in. Best
Large Flowered for Outdoors

Exhibition Chrysanthemums

The hardy Chrysanthemum is fine for planting in the hardy border for they add a wealth of color and blooms to the garden when the other blooming plants are on the wane. They should be protected during the winter with a litter of leaves and straw.

Chrysolora, incurved yellow.
O'Conta, incurved white.
October Rose, large incurved.
Indianola, old rose and bronze.

The above 4 varieties and colors of incurved exhibition Chrysanthemums are the best for outdoor planting, maturing early, needing little or no protection. 15c each, 8 for \$1.00, from Pots—Postpaid.

All Chrysanthemums we send out are strong healthy pot grown plants, sent out of pots. PRICE—Producing quantities of Chrysanthemum plants we are able to make this very low price for thrifty pot grown plants which we send out. But we must ask you to add 15 cents packing and postage to each order amounting to less than \$1.00. We will give one New York (new) Free with a \$2.00 order from the above list.

The following list of chrysanthemums are all priced at 15 cents each for pot grown plants except where noted.

EXHIBITION VARIETIES

Christmas Gold.
Sun Gold.
Pink Chieftain—Mid-season.
McNies Pink—Mid-season.
McNies White—Mid-season.
White Turner—Ex. Large Mid-season.
Pink Turner—Ex. Large—Mid-season.
Mistletoe—White—Late.
Mistletoe—Yellow—Late.
Gladys Pierson—Bronze—Late.

Hardy Baby Varieties

HEALTHY POT GROWN PLANTS

Dainty Maid, Pearly white.
Dotson, Old rose, button reflex.
Buckingham, Bronze.
Buckingham, Pink, single.
Lillian Doty, Shell pink.
White Doty, White ball.
Red Doty, Red ball.
Yellow Doty, Golden ball.
Doris, Yellow button.
Nuggets, Golden buttons.
Source de Or, Golden Aster.
Rodell, Yellow Button.

The above list of Hardy Baby Chrysanthemums are some of the choicest for bedding or planting in the perennial borders. 15c each, any 8 for \$1.00 Postpaid—Pot Grown.

Other Hardy Varieties

Doris—Dark Bronze
Baby—White Button—Tiny.
Jules LaGrave—Red Aster.
Fire Light—Red Button.
Elizabeth McDowell—Single Orange Bronze.
New York—Gold Button, 20c each.

Perennials Offer Constant Variety

For all the passing glory of our annuals, the perennials offer that continuous bloom which is the joy and satisfaction of every gardener's heart. Until the end of the flowering season these plants seem to vie with each other. Perennials achieve a great march of color, luxuriant and fragrant of bloom.

Plants may be set in shrubby borders, solid beds or rockeries. For those plants of dwarfer habits, much better results may be obtained by planting them in rockeries as the mounded earth has a tendency to give better drainage and the rocks have the tendency to protect the rootlets during the hot, dry summer. When flowers are wanted for cutting they are best handled if planted in level beds where they can be cultivated at intervals. Avoid hoeing deeply, merely stirring the soil surface so the young roots will not be torn.

In setting them out, remember to place the tall plants such as false dragonhead and creamy white plumed poppy, the hollyhocks, tall hardy asters and delphiniums in the background, all these grow at least four feet. Put the shorter ones near the

middle of the bed, such as Veronica, Pyrethrum, Gypsophila and Columbines.

Next toward the front plant those that grow about a foot and a half high and so on down to the very edge where the tiniest plants are established. In gay, varying groups of these small plants the pink dianthus, yellow English primrose, dwarf Jacob's ladder, arenaria, alyssum, area-bis and baby iris.

Iris in any of its fascinating varieties is one of the first wonders of the garden in spring. It is hardy in dry or moist soil. The clumps should be divided every three or four years to maintain healthy developing conditions.

In April and May you may have blue hepatica, moss pink, candytuft and other low plants awakening. Over their shoulders the daisies and pyrethrum will be awakening from a throng of brilliant orange wallflowers, with the exquisite blooms of Alice blue scabosia fluttering nearby.

Delicately fragrant violas and primulas flourish beautifully in the shady places from May until frost.

BEDDING PLANTS

Zinnia Plants—Fine strong plants for bedding, giant Dahlia flowering type, mixed colors. 25c doz., 3 doz.

Zinnia, Lilliput—A fine small flowering type growing about a foot tall. Attractive round, fully double, button-like blooms about 1 inch in diameter, makes a fine display, fine for cutting. 25c doz., 3 doz. 65c.

Aster Plants—For bedding, mixed colors. 20c doz., 3 doz. 50c.

Marigold, Dwarf—Legion of Honor—Single golden yellow flowers with brown centers. 20c doz., 3 doz. 50c.

Marigold—Dwarf—Golden yellow blooms edged with brown—very attractive. 20c doz., 3 doz. 50c.

Viola—White. 15c ea., 3 for 35c.

Viola—Blue. 15c ea., 3 for 35c.

Ivy Geraniums—Single pink or double red. 30c ea., 3 for 75c.

OLD FASHIONED GARDENS

Dozen Selected Roses

Grown on their own roots, with no wild suckers. Potted and grown in pots. Can be planted any time successfully. 30 cents each. Your selection six plants \$1.60. 12 plants \$3.00, delivered to your door.

Alex. Hill Gray (T)—Pale lemon yellow, deepening in the center of its perfectly formed fragrant flowers. One of the hardiest and most beautiful of tea roses.

Columbia (HT)—Bright pink, deepening as it opens. Large fragrant flowers.

Dame Edith Helen (HT)—Gold medal winner of recent introduction. One of the most valuable additions to the hybrid tea class. The color is brilliant, yet soft pink, and the flower is delightfully sweet-scented. A strong and vigorous grower.

E. G. Hill (HT)—A new red rose originated by Mr. E. G. Hill. A dazzling scarlet shading to a deeper red. Originator claims it never turns purple. Undoubtedly a fine new red rose.

Etoile de Hollande (HT)—Flowers bright red of medium size, fairly full, deliciously perfumed. Growth vigorous, upright, a rose of great future.

Golden Ophelia (HT)—This is a sturdy, stiff-stemmed grower with beautiful foliage. Quite closely set, and glossy. A medium flower from a beautifully formed bud of bright golden yellow. Profuse bloomer.

Lady Margaret Stewart (HT)—Another gold medal winner of recent introduction. Long pointed buds

of a deep sunflower yellow veined with orange scarlet as the flower opens. These colors intermingle, forming a beautiful cadmium orange effect, with a very pleasant odor.

Mad. Butterfly (HT)—A sort of Ophelia with better growth, more color, bright pink suffused with apricot and gold. Good growth and habit.

Mrs. Chas. Bell (HT)—It may be described as a shell-pink Radiance and is a sort of that well-known rose. One of the Three most distinctive colored roses grown. Excellent habit and free.

Mrs. Henry Moose (HT)—Long pointed, large buds, flowers very large, high center and double; fragrant color fresh cream ground with a sheen of bright rose deeply impregnated and washed vermillion.

Radiance (HT)—Brilliant rose pink buds opening to well-formed shining flowers, globular shaped and very fragrant.

Rev. F. Page Roberts (HT)—A fine rose of vigorous habit, with good shaped blooms which are carried erect on long stiff stems and are very sweetly scented. The color is an orange-yellow becoming brighter at the edges of the petals. It is an excellent exhibition and garden rose.

FOUR LEADING COLORS OF HARDY CLIMBING ROSES

30c each or any (4) plants \$1.10 postpaid

Dr. W. Van Fleet—Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkably delicate shade of flesh-pink on the outer surface, deepening to rosy flesh in the center.

Paul's Lemon Pillar (Cl HT)—Pale lemon buds and faint sulphur yellow flowers. Double, well-formed and fragrant, strong grower.

Emily Gray—A new yellow climbing rose with glossy undulated holly-like foliage. The buds are long and flowers of golden yellow and large and semi-double. A valuable acquisition. Needs protection north of Washington, D. C.

Paul's Scarlet Climber (HW)—Vivid scarlet shaded crimson. A wonder of climbing roses. We consider it the most wonderful of all Hardy Climbing roses.

OLD FASHIONED GARDENS

Iris Kaempferi [Japanese Iris]

The varieties of Japanese Iris listed here were selected as the best of the Standard and New varieties grown today.

Gold Bound—For all general purposes it is the best white variety of strong growth and good habits. 40c each, 10 for \$3.65.

Gekka-No-Nami—Earliest to bloom, very free flowering, glistening white with creamy white stigmas. 40c each, 10 for \$3.65.

Koki-No-Fro—Purple and gold. Enormous double flowers, often eight inches across, early and free blooming. One of the very best varieties. Color rich violet-purple with white petaloides tipped violet. The conspicuous golden throat extends outward in sharp bluish white rays (scarce). 65c each, 10 for \$5.00.

Blue Danube—A pure rich blue, with velvety center; six petals. A distinct and outstanding blue variety. 60c each, 10 for \$4.75.

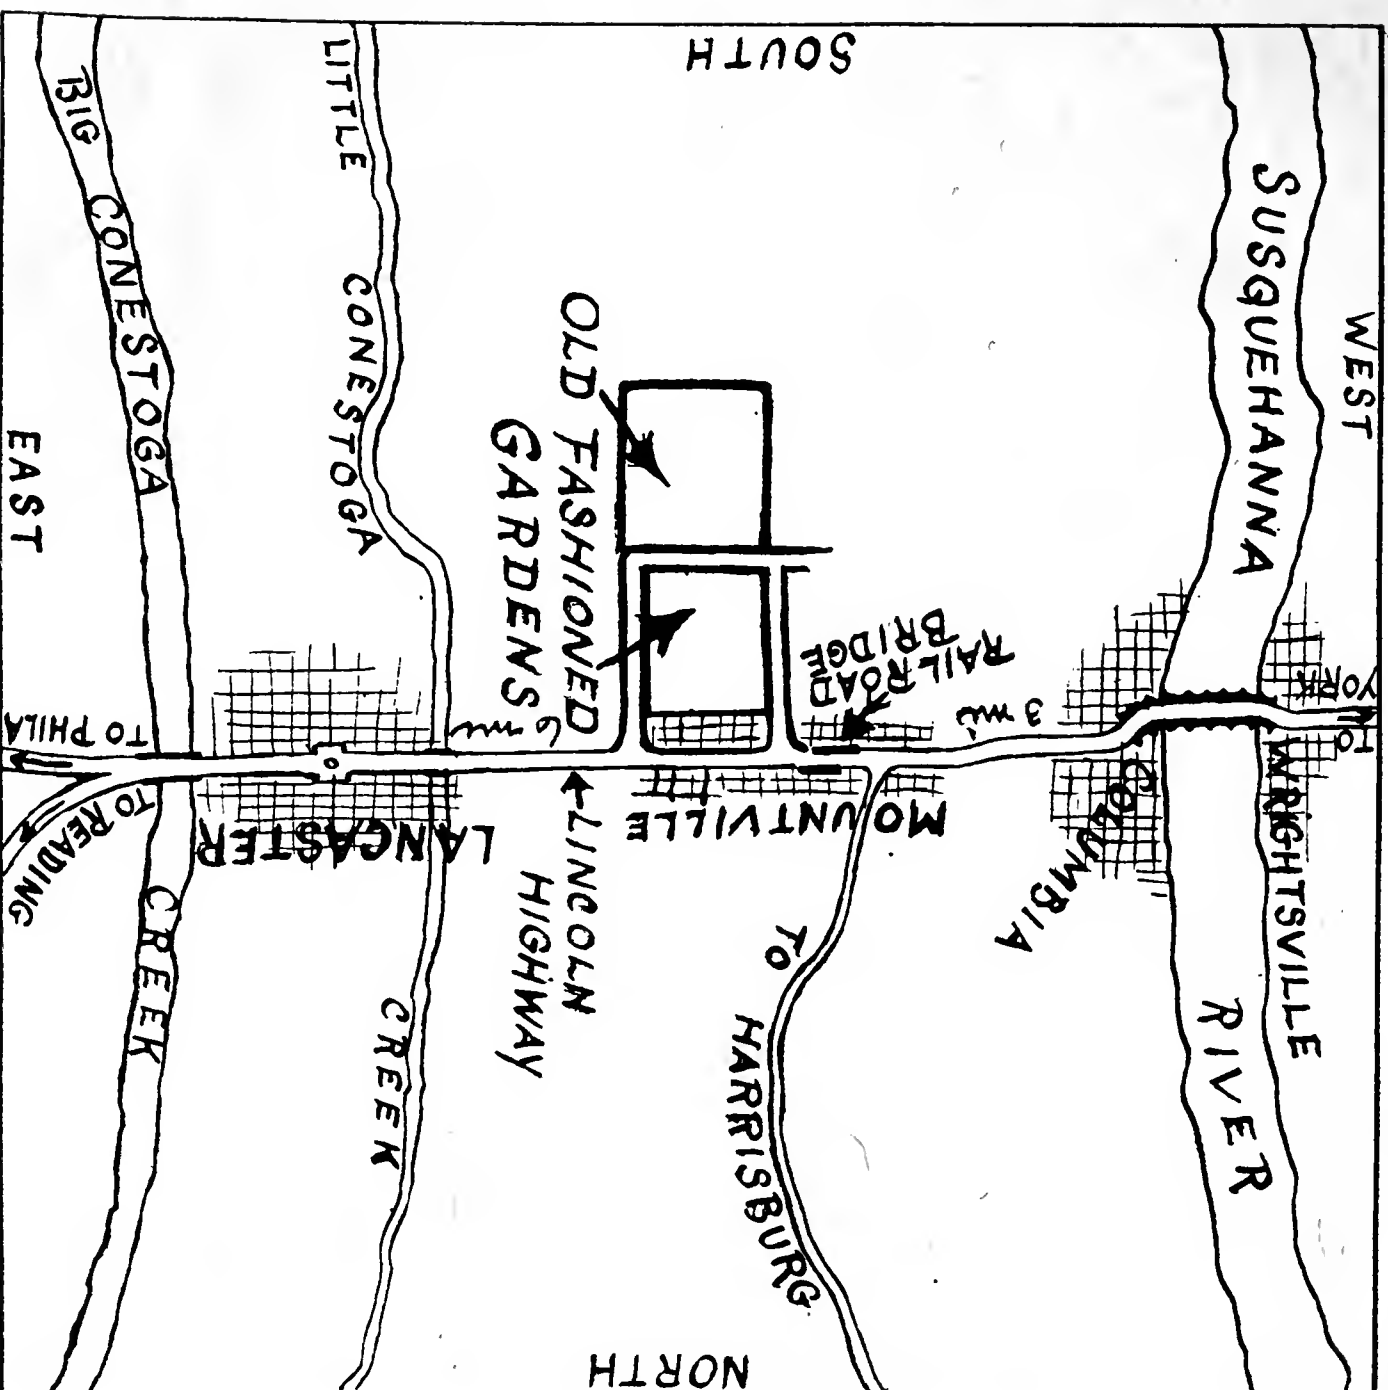

Mahogany—An attractive red, shaded maroon. Flowers are not as large as some other varieties, but the color of this double flowered form makes it a favorite variety. 50c each, 10 for \$4.50.

Uchin (Universe)—Beautiful, six petaled flowers of largest size on extra long stems. Color Cerulean blue, with golden center and white. This variety covers the longest blooming season and is altogether one of the most attractive. 60c each, 10 for \$5.25.

JANANESE IRIS

Collection of Six Selected Named Varieties listed above. One clump each or six clumps for \$2.85, Value \$3.15
